**IACUC Review process for New protocols**

Departmental review **must be completed** before submission by the UNCG Office of Research Integrity (ORI). This will ensure the version of the protocol seen by the IACUC is the final, most complete version.

**Submission to ORI**

**Any issues I must be addressed before the protocol can be added to the IACUC agenda**

When the new protocol has addressed the issues from the department, vet, and ORI, it will be added to the agenda to be reviewed by the IACUC at the next meeting. This needs to happen **at least seven (7) days** before a meeting if you want to be included at this month’s meeting. Full Committee Review can lead to the following outcomes:

- Protocol may be tabled for review at a future meeting
- Requires modification to secure approval
- Approval withheld

Any revisions or clarification requested at the IACUC meeting will be sent to the PI.

PI addresses requested modifications sufficiently

**Protocol approval**
