>> Human Research Application for IRB Approval

Welcome to IRBIS, the IRB Information System. The system is designed to be used for all of your interactions with the IRB. Here you can create new applications, modify or update approved studies and view the status of pending submissions. After you select the relevant action from the left hand column, you will be prompted to provide the information needed to complete your submission, including consent forms, as relevant. Your application will be customized to fit the circumstances of your research, depending on your responses as you proceed. The questions are designed to be answered in a sequential order; however, you may use the links in the left column to revisit any portion of the application. Once you have provided the necessary information, your submission will be electronically certified by the principal investigator, routed for department level approvals (when indicated) and then received by the IRB.
